

What If Everyone Had a Personal Coach?

Individualized Coaching ROI at Enterprise Scale

Why Gaps Persist After Training

- 1 Experts' limited time consumed by repeat questions.
- 2 Time zone bottleneck for global teams.
- 3 Learners afraid of looking unprepared.
- 4 Hard-to-search training content.
- 5 Costly course updates.

What Sets This Apart?

Sustainable Solution:

Easy updates without rebuilding the entire course for minor knowledge updates.

Smart Access Control:

Can be configured to be available only after eLearning completion.

Seamless Integration:

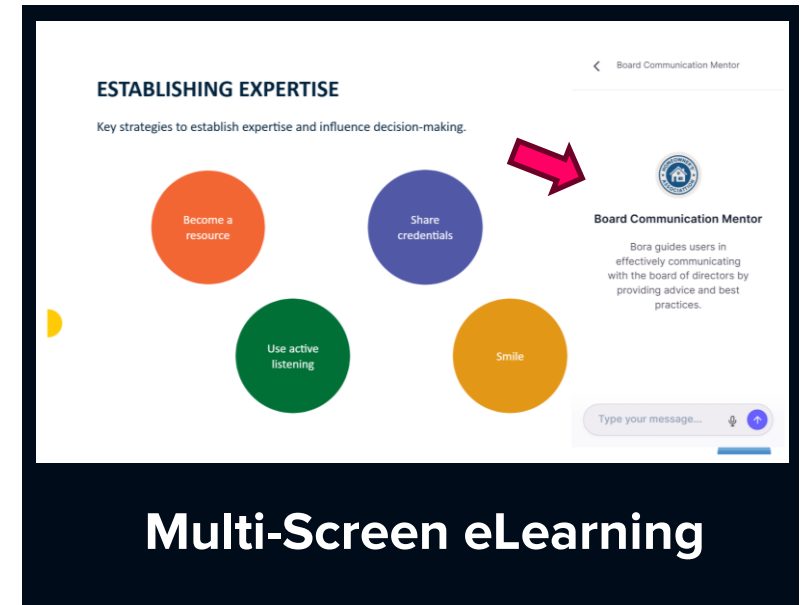

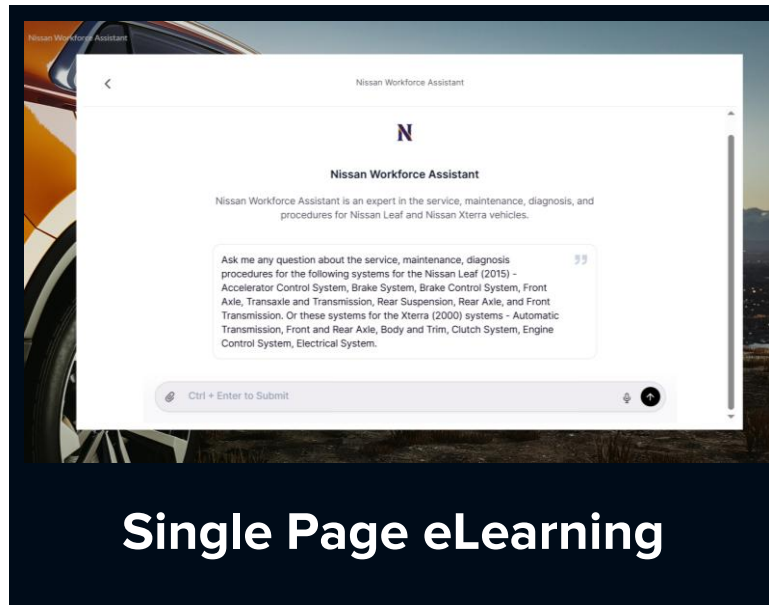

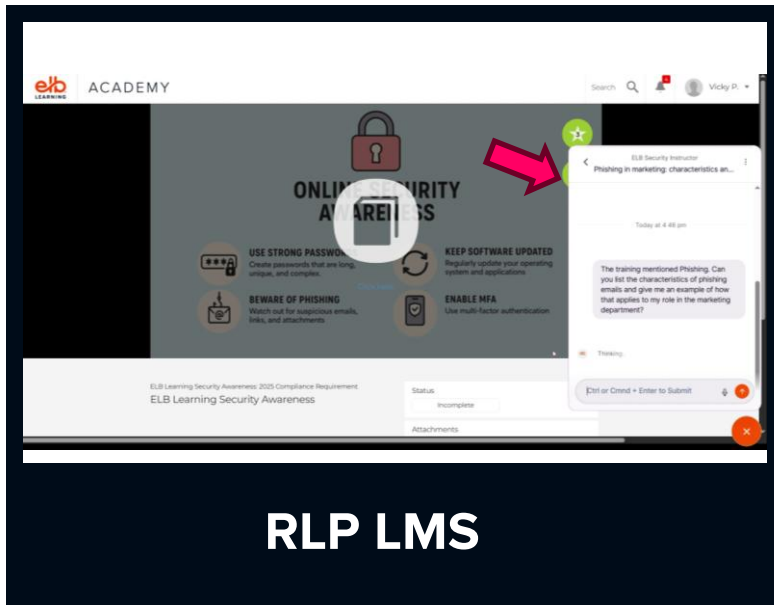

Existing RLP customers can selectively turn on AI Learning Companions on individual pages.

or

You can use one simple SCORM package that launches right from your existing LMS. Learners can bookmark a deeplink from your LMS to launch the tool directly.

Deployment Options

Multiple Launch Points, Single Source of Truth

Tutors to Assistants

Tutors

Tutors are for curriculum revision, recall, and practice.

Sample user query

“Walk me through the 5-step process for handling a customer complaint about a defective product, according to our store's return policy.”

Assistants

Assistants help with real-world application of concepts.

Sample user query

“Take a look at this Profit and Loss statement. Give me a breakdown of my margin targets for the next 3 quarters based on our best practices.”

Pharmaceuticals & Life Sciences

Tutor

Sample user query

“Quiz me on the top three side effects of Product X and give me a scenario for how to ethically discuss them with a healthcare professional according to our code of conduct.”

Assistant

Sample user query

“Here is my sales territory data for the last quarter and the profile of Dr. Smith, a cardiologist I'm meeting. Based on her prescribing history and our product's clinical trial results for cardiac patients, generate a custom call plan with key talking points and potential objections.”

How Others Compare

Criteria	ELB AI Learning Companion	 NotebookLM	 OpenAI  Claude  Gemini	Multi-Agent Frameworks like MS AutoGen, OAI Swarm, Crew AI
LLM Agnostic	Yes	No	No	Yes (High Dev Effort)
Build and Deployment Ease	Very High	Very High (Limited Use Cases)	Medium	Low
Customization	Very High	Low	High (High Dev Effort)	Very High High Dev Effort
Usage Reports	Yes	Yes	Yes (High Dev Effort)	Yes (Dev Effort Required)
Qualitative Analytics	Yes	No	Yes (High Dev Effort)	Yes (Dev Effort Required)
Embeddability	High. Already Integrated Into RLM LMS. Can Be Embedded Into eLearning SCORM Packages.	Low	Very High (High Dev Effort)	Very High (High Dev Effort)
